

"Your Online Daycare Community"

Daycarewebwatch.com

Daycarewebwatch is a company that helps daycare centres by providing a full online daycare community. Our service brings to parents real time, colour web video from cameras installed at your centre, which attach to our secure World Wide Web site.

This exciting new service is now available to help enhance the quality and security of your centre and to increase revenues, while providing parents with a service to share in their child's day.

Surveys conducted show that 89% of parents prefer to put their children in a daycare centre or preschool, which has installed a web video system. In addition, 84% of parents would be willing to pay less than the price of a cup of coffee per day, if this system, were installed at their daycare centre. This is a service that parents want and will demand in the future. Why not get ready for it?

Daycarewebwatch supplies and sets up all the required hardware for the daycare centre to run the system. A computer network is not required and *no computer knowledge is necessary* to operate the system.

Our web video service utilizes today's new generation of high-speed modems and advanced software. You can use a standard web browser with no special software or plug-ins.

"A new window into a child's world!"

This Is Our Team ...

→ Daycare Operators

BENEFITS for Your Daycare

- Childcare centre owners and directors can monitor the activity in all of the classrooms in their centre (or multiple centres) without leaving their offices.
- Provides daycare management software to assist with administrative operations at no cost
- Offers a cost-effective on-line one-stop shopping service to order daycare supplies through www.mydaycaresupplier.com
- Supplies an online bulletin board for your community
- Helps to increase retention percentage
- Becomes an excellent marketing tool for an increasingly competitive field.
- Provides centres with an Internet web page to create their own web presence.
- Service is offered as a feature for your daycare or can be used to generate additional revenue or fundraising stream.
- System setup can be easily expanded as needs change
- Free listing in the Canadian Childcare Directory

→ Parents/Families

BENEFITS for Your Parents/Families

- Parents have peace of mind knowing they can share in their child's classroom from their home or office at any time
- Helps parents to communicate more effectively with their children by participating in their child's day.
- Opens lines of communication between parents and educators, promoting a more cooperative learning environment.
- Makes a great gift for grandparents (including those who live far away) to watch their grandchildren playing from across the country or anywhere in the world, through Internet access
- Access to the service is provided through the use of a User I.D. and password
- Online resource centre and bulletin board
- A tax deductible service
