

Can your children contact you when they need you the most?

Parent Finder is an **emergency telephone connection service** provided by EasyTel® Canada. The objective of our service is to offer the best way to connect families everywhere!

We provide parents and their children with a **toll-free number** and their **own personal extension**. In an emergency, children can dial the toll-free number and instantly be connected with their parent(s) anywhere in North America. The same toll-free number can be given to the child's caretaker, daycare/camp, school administrator/teacher or extracurricular activity supervisor to dial when an emergency occurs. This service is available to parent(s) with children of all ages.

When dialing the Parent Finder number, the service **automatically dials a series of pre-programmed** numbers locating the parent(s). Parent(s) can program up to three numbers at one time, such as the mother's and/or father's work, mobile or home number.

The greatest **benefit for parent(s)** is that when they change their work, mobile or home number, they only need to update their Parent Finder service. The greatest **benefit for children** is that they can instantly be connected with their parents when they need them the most!
